

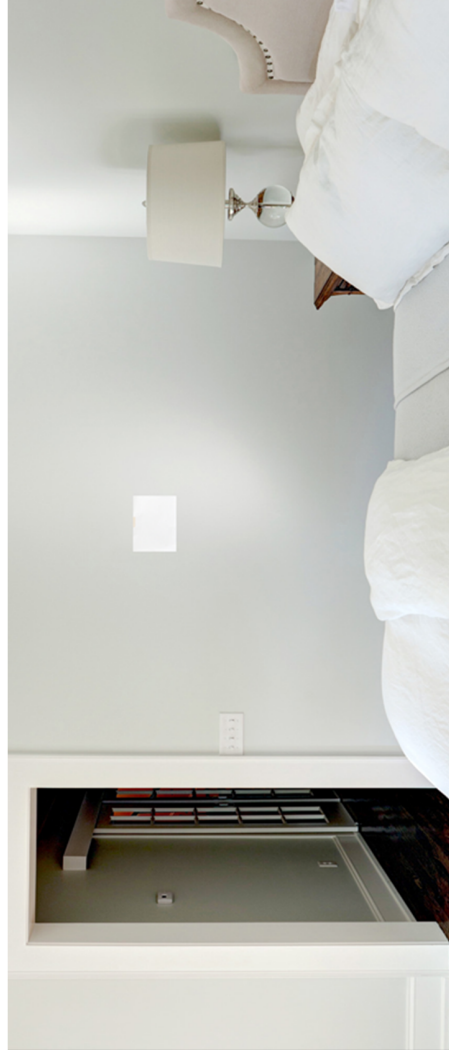

Photographing Your Walls

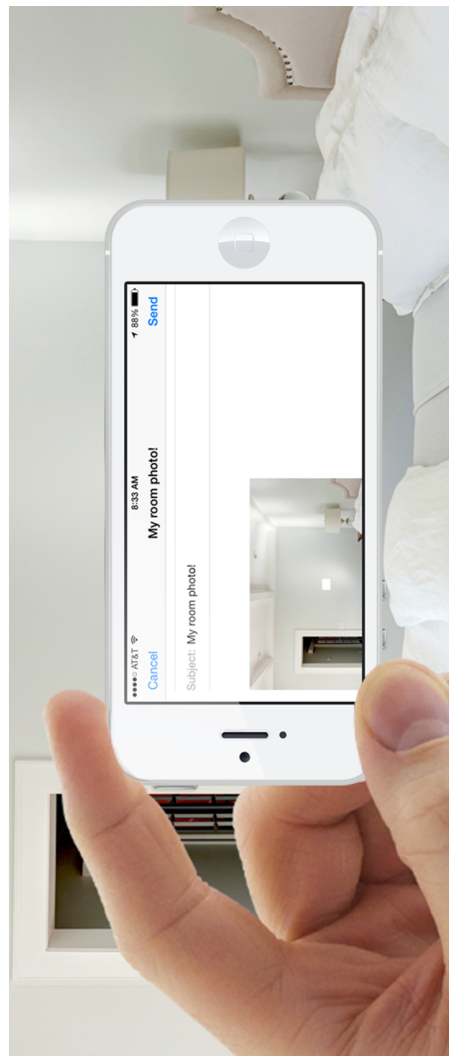

1 Make sure you have something on the wall where you want your wall art that you know the exact size of. The easiest way to do this is to tape a standard size piece of paper where you want your wall art.

3 Take a picture with your camera or your smart phone. Try to get a doorway, window or some furniture in the image to give you a visual reference for the size of your future wall art.

2 Step back as far as possible and face straight at the wall, not at an angle.

4 Email or text that photo to me.
